Submitted on 20 Feb 2019

HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

HCERES

High Council for the Evaluation of Research
and Higher Education

Department of Research Evaluation

report on research unit:

Surgery and cephalic extremity: functional and
morphologic characterisation

CHIMERE

under the supervision of
the following institutions
and research bodies:

Université de Picardie Jules Verne

Institut National de la Santé Et de la Recherche
Médicale - INSERM

Evaluation Campaign 2016-2017 (Group C)

HCERES

High Council for the Evaluation of Research
and Higher Education

Department of Research Evaluation

In the name of HCERES,¹

Michel Cosnard, president

In the name of the experts committee,²

Henning Madry, chairman of the committee

Under the decree N^o.2014-1365 dated 14 november 2014,

¹ The president of HCERES "countersigns the evaluation reports set up by the experts committees and signed by their chairman." (Article 8, paragraph 5)

² The evaluation reports "are signed by the chairman of the expert committee". (Article 11, paragraph 2)

Evaluation report

This report is the sole result of evaluation by the expert committee, the composition of which is specified below.

The assessments contained herein are the expression of an independent and collegial reviewing by the committee.

Unit name:	Surgery and cephalic extremity: functional and morphologic characterisation
Unit acronym:	CHIMERE
Label requested:	INSERM
Current number:	
Name of Director (2016-2017):	Mr Bernard DEVAUCHELLE and Mr Olivier BALEDENT
Name of Project Leader (2018-2022):	Mr Jean-Marc CONSTANS

Expert committee members

Chair:	Mr Henning MADRY, Universität des Saarlandes, Homburg, Germany
Experts:	Ms Catherine GHEZZI, UJF Grenoble (representative of the INSERM) Mr Dominique GOGA, Université de Tours (representative of the CNU) Mr Gilles RENAULT, Institut Cochin, INSERM Ms Valérie VANNEAUX, Hôpital Saint-Louis
Scientific delegate representing the HCERES:	Ms Véronique MIGONNEY

Representatives of supervising institutions and bodies:

Mr Mohamed BELAHSEN, Université de Picardie Jules Verne
Mr Arnaud COLLIN, CHU Amiens-Picardie
Ms Marie-Josèphe LEROY-ZAMIA, INSERM

Heads of Doctoral Schools:

Ms Tiphaine BARTHÉLÉMY, Doctoral School n° 586, "Social and Human Sciences"
Mr Christian MASQUELIER, Doctoral School n° 585, "Sciences and Health"

1 • Introduction

History and geographical location of the unit

The “CHIRURGIE & EXTREMITÉ CÉPHALIQUE Caractérisation morphologique et fonctionnelle” (CHIMERE) is planned as a newly created interdisciplinary team. It results from the clinical, scientific and geographical association between groups from the “Université de Picardie Jules Verne” (UPJV) and the CHU Amiens-Picardie to promote interdisciplinary work, exchanges, and teaching/training between the different surgical and research teams located in hospitals, IRM platform, TEP platform, CURS (Centre Universitaire de Recherche en Santé), and IFF (Institut Faire Faces). The goal of CHIMERE is to regroup the teams (around 50 persons) into a new IFF building (FEDER and regional council) hosting research labs, imagery platform, operating theatres, and an animal facility.

Management team

The unit will be headed by Mr Jean-Marc CONSTANS, deputised by Mr Bernard DEVAUCHELLE.

HCERES nomenclature

Domaine principal: SVE Sciences du Vivant et Environnement.

Sous domaine: SHS4 Esprit humain, langage, education.

Scientific domains

The main domain concerns surgical research in the area of the face as cranio maxillo facial surgery for malformations, traumatology, cancerology, reconstruction and various developments as tissue engineering, medical imaging, robot guided procedures, biological characterisation in treatment of tumors and social sciences.

Unit workforce

Unit workforce	Number on 30/06/2016	Number on 01/01/2018
N1: Permanent professors and similar positions	14 FTE 4.62	17
N2: Permanent researchers from Institutions and similar positions	1 FTE 1	2
N3: Other permanent staff (technicians and administrative personnel)	8 FTE 2.64	10
N4: Other researchers (Postdoctoral students, visitors, etc.)	27 FTE 11.94	
N5: Emeritus	1 FTE 0.33	
N6: Other contractual staff (technicians and administrative personnel)	0	
N7: PhD students	14	
TOTAL N1 to N7	65	
Qualified research supervisors (HDR) or similar positions	17	

Unit record	From 01/01/2011 to 30/06/2016
PhD theses defended	14
Postdoctoral scientists having spent at least 12 months in the unit	4
Number of Research Supervisor Qualifications (HDR) obtained during the period	4

2 • Assessment of the unit

Global assessment of the unit

The goal of the present application is to create a unique team “CHIMERE” based on the convergence and complementarity of several teams around the theme of facial reconstructive surgery, as a logical consequence of the 1st world face graft in 2005.

CHIMERE is a world-leading project, absolutely indispensable in France, Europe and in the world of facial reconstruction, involving face, brain, olfaction, vision and social image. The hosting of CHIMERE in a new building shows the strong interest and support of authorities for the project.

Independently, all groups are experts in their respective fields and have shown their very strong scientific and academic potential and activities at national and international levels (expertise in surgery, imaging, biology, SHS, reputation, publications, collaborations, platforms, awards, meeting organisation, reviewer activities, international exchanges, networks, grants and contracts, patents, clinical studies, training).

The added value of combining the entities in the inter-thematic CHIMERE is highly promising in terms of potential for success and productivity.

For all these reasons, this project represents the highest quality reachable in this field at the international level.
