Submitted on 20 Feb 2019

**HAL** is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

REPORT ON THE RESEARCH UNIT:  
Institute of Psychiatry and Neuroscience of Paris  
(IPNP)

UNDER THE SUPERVISION OF THE  
FOLLOWING INSTITUTIONS AND  
RESEARCH BODIES:

Université Paris Descartes  
Institut National de la Santé et de la Recherche  
Médicale – INSERM

**EVALUATION CAMPAIGN 2017-2018**  
GROUP D

In the name of Hcéres<sup>1</sup>:

Michel Cosnard, President

In the name of the expert committee<sup>2</sup>:

Keith Muir, Chairman of the committee

Under the decree No.2014-1365 dated 14 November 2014,

<sup>1</sup> The president of Hcéres "countersigns the evaluation reports set up by the expert committees and signed by their chairman." (Article 8, paragraph 5);

<sup>2</sup> The evaluation reports "are signed by the chairman of the expert committee". (Article 11, paragraph 2).

This report is the sole result of the unit's evaluation by the expert committee, the composition of which is specified below. The assessments contained herein are the expression of an independent and collegial reviewing by the committee.

## UNIT PRESENTATION

<b>Unit name:</b>	Institute of Psychiatry and Neuroscience of Paris
<b>Unit acronym:</b>	IPNP
<b>Requested label:</b>	
<b>Application type:</b>	Restructuration
<b>Current number:</b>	
<b>Head of the unit (2017-2018):</b>	Mr Thierry GALLI
<b>Project leader (2019-2023):</b>	Mr Thierry GALLI
<b>Number of teams:</b>	10

## COMMITTEE MEMBERS

<b>Chair:</b>	Mr Keith MUIR, University of Glasgow, United Kingdom
<b>Experts:</b>	Mr Raoul BELZEAUX, Assistance Publique Hôpitaux de Marseille et Institut de Neurosciences de la Timone, Marseille Ms Catherine BELZUNG, Université François Rabelais, Tours (representative of CNU) Mr Guy COURBEBASSE, INSA Lyon (supporting personnel) Ms Valérie CREPEL, INMED, Marseille Mr Alban DE KERCHOVE, ULB Neuroscience Institute, Belgium Mr Carlos DOTTI, CBM, Madrid, Spain Mr Nasser HADDJERI, Institut Cellule Souche et Cerveau, Bron (representative of INSERM CSS) Mr Carlos MATUTE, Basque Center for Neuroscience, Leioa, Spain Ms Marta NIETO LOPEZ, Centro Nacional de Biotecnología, Madrid, Spain Mr Cyril POUPON, CEA/NeuroSpin, Gif/Yvette
<b>HCERES scientific officer:</b>	Ms Catherine HEURTEAUX

**Representatives of supervising institutions and bodies:**

Ms Marie-Louise KEMEL, INSERM

Mr Stefano MARULLO, Université Paris Descartes

## INTRODUCTION

### HISTORY AND GEOGRAPHICAL LOCATION OF THE UNIT

The IPNP is located in a new building at the Hôpital St Anne site. The IPNP is a new configuration arising as a result of re-organisation of several historical research teams based at the hospital and/or in the Centre for Neuroscience de Paris. Since 2016, the IPNP has been formed by assembling new research teams on the advice of an International Scientific Advisory Board in conjunction with the director and in consideration of the optimal potential for translational neuroscience. The research unit was reorganised under the current director from late 2015 in order to manage a transition to a new grouping of research teams and to oversee the move into a new building that opened in February 2017. The unit continues the site's experience in clinical psychiatry and neurology research, but has expanded by adding a number of teams. Many of the teams have joined or relocated to the new building within the months preceding the visit.

### MANAGEMENT TEAM

Mr Thierry GALLI.

### HCERES NOMENCLATURE

SVE4\_1 Neurologie.

### SCIENTIFIC DOMAIN

The unit is focused on basic, translational and clinical neuroscience.

### UNIT WORKFORCE

Unit workforce	Number 30/06/2017	Number 01/01/2019
<b>Permanent staff</b>		
Full professors and similar positions	27	25
Assistant professors and similar positions	13	9
Full time research directors (Directeurs de recherche) and similar positions	27	10
Full time research associates (Chargés de recherche) and similar positions	15	11
Other scientists ("Conservateurs, cadres scientifiques des EPIC, fondations, industries, etc.")	0	0
High school teachers	0	0
Supporting personnel (ITAs, BIATSSs and others, notably of EPICs)	66	51
<b>TOTAL permanent staff</b>	<b>148</b>	<b>106</b>
<b>Non-permanent staff</b>		

Non-permanent professors and associate professors, including emeritus	28	
Non-permanent full time scientists, including emeritus, post-docs	7	
Non-permanent supporting personnel	15	
PhD Students	96	
<b>TOTAL non-permanent staff</b>	<b>146</b>	
<b>TOTAL unit</b>	<b>294</b>	

## GLOBAL ASSESSMENT OF THE UNIT

The unit is in the process of implementing a new scientific strategy involving organisational and physical reconfiguration. This new strategy will strengthen the unit's excellent potential for translational research, especially in the fields that are clinical strengths of the unit, principally cerebrovascular diseases and psychiatry. The unit has recruited basic and translational research teams of international standing across several fields of research, and the research strategy includes recruitment of junior research teams. The unit additionally includes a number of core facilities to support the range of basic and translational neuroscience activities. There are a number of common research interests across the teams that are already prompting new collaborations and joint grant applications. Research outputs of the unit are very good to excellent, and funding from major national funders supports most teams. The unit provides very good training for PhD students in translational and clinical research. The unit provides a framework for collaborative research, and where appropriate, has very good levels of public and societal engagement and interactions with the wider scientific community. The unit has very good engagement with industry and promotes commercialisation activities, including filing of patents.
